

OFFICIAL PAPER

SoElNino

\$NINO on Solana

So, El Niño. A community token. Not a protocol. Not weather science. Not a security.

1. What this is

SoElNino is a Solana community token with the ticker **\$NINO**. The brand is a joke with a face: a gold wave-boy riding a warm Pacific current. El Niño is the weather pattern. \$NINO is the coin. They are not the same thing.

This paper exists so one document matches the website, X, and Telegram. It is not a technical specification, not a forecast, and not an offering memorandum. There is no promised product roadmap that must ship, and no claim that holding \$NINO produces profit.

2. Official sources

Place	Handle / URL	Job
Website	https://soelnino.com	Contract, buy link, this paper
X	https://x.com/solelnino	Discovery and pins
Telegram channel	https://t.me/soelnino	Official posts only
Telegram chat	https://t.me/soelninochat	Holder talk
Contract (CA)	Not live at paper date. Will appear on soelnino.com first.	Single source of truth

If a link, contract, or account does not match this table and the live site, it is not SoElNino. Admins never DM first. Nobody from this project will ask for a seed phrase or a wallet connect.

3. Chain and token

Planned launch is a Solana token, intended through Pump.fun, then a public pool if the curve completes. Buy with SOL in a self-custody wallet such as Phantom or Solflare. Confirm the wave-boy logo and the contract on

soelnino.com before signing.

Item	Intent at launch
Ticker	\$NINO
Name	SoElNino
Chain	Solana
Supply (stated target)	1,000,000,000. Final on-chain supply is whatever the mint actually creates. Trust the explorer, not this sentence.
Decimals (target)	6, if the mint tool allows it
Mint authority	Revoke after mint, or follow Pump.fun's live rules so new supply cannot be created by a team wallet
Freeze authority	Revoke so accounts cannot be frozen by a team key
Liquidity	On Pump.fun the bonding curve holds liquidity until graduation. After that, LP should be burned or locked and proof posted on the site and channel.

4. Token split (intent, not a promise of value)

If launch is on Pump.fun, the curve — not a private treasury — prices the token until it graduates. Any later split is a statement of intent only and must match what is actually on-chain.

Site intent if a treasury exists after launch: liquidity majority, a small community/contest sleeve, a smaller ops sleeve. Do not treat those bars as a guaranteed allocation until they are published next to a live contract.

5. Brand

One face: gold wave-boy, lightning hair, teal wave, dark water. Gold and teal only. The official look is the original emblem, not a chibi redesign. The line is *So, El Niño*. The site is the only page that may publish the contract.

Weather copy on the site points at NOAA CPC and IRI. SoElNino is unofficial and unaffiliated with those agencies. ENSO status is atmosphere, not a trading signal.

6. What will not be claimed

- No guaranteed returns, floor price, or “100x.”
- No registered security, equity, dividend, or DAO vote that controls a company.
- No affiliation with NOAA, NASA, or any meteorological office.
- No other \$NINO mint is official unless its contract is printed on soelnino.com.
- No utility is required for the token to exist. Utility is optional and only if it is later earned in public.

7. Season / public work

Pre-launch. Brand, site, X @solelnino, Telegram channel and chat, teaser posts. Contract field stays empty.

Launch. Mint. Same contract on soelnino.com, the X pin, and the Telegram channel pin in the same hour. Revoke mint and freeze when the launch tool allows. Post liquidity proof.

After. Keep posting. Moderate drainers. Do not invent exchange listings. Do not staff a fake firm.

8. Risk

Most new tokens lose most or all of their value. Liquidity can vanish. Copies will use the same name. Smart-contract and wallet-phishing risk sits with the holder. Only use money that can go to zero. This paper does not change that.

9. Possible later work

If \$NINO is still alive after launch, the only extra work worth doing is public and optional: community tools on soelnino.com, holder contests, and simple on-chain extras that do not require a new mint.

Nothing in this section is a commitment, a product spec, or a reason to buy. No utility is required for \$NINO to exist. If something ships, it will be announced on soelnino.com and in the channel pin first.

Disclaimer

SoElNino (\$NINO) is a community meme token on Solana. This document is information about a brand and a planned token. It is not financial, legal, or tax advice. It is not an offer to sell or a solicitation to buy any security. Nothing here is a weather forecast or an endorsement by any scientific agency. Contracts, supply, and authorities are defined on-chain. If this paper and the chain disagree, the chain wins. Version: September 2026. Update the contract line on soelnino.com when the mint exists; republish this file with the CA in section 2.
